Members of the Petoskey High School Robotics Team do more than just build and control walking, talking machines. They think beyond what others think, they imagine what seems to be impossible. Given directions, guidelines, a box of parts and a task, they design, program, and build in six weeks what only a few could begin to understand. The 2014 team constructed a robot that can throw, catch and shoot a large exercise ball.

The team competed in two district competitions and strived to earn a chance to compete at the international level.

Funds for the program are acquired through sponsorships from local companies and fundraising by the team. The robotics team is coached by Tom Ochs with help from volunteer mentors.
